About me

Determined and productive junior web developer with experience in both front-end and back-end development. Worked on Mapa, an non-profit project that connects local initiatives and volunteers on an interactive map. Also worked as a web administrator and engineer at JSC MNIPI, a small research institute that develops high-precision measuring devices. Seeking to learn, grow and develop long-term by applying skills to an interesting and challenging project.

Employment history

JSC MNIPI

AUGUST • 2022 -
AUGUST • 2023

Web administrator

Maintained the corporate website: added and created new content, updated information about company products and implemented new features.

JSC MNIPI

AUGUST • 2021 -
AUGUST • 2023

PCB Design Engineer

Designed advanced printed circuit boards for high-precision measuring devices, created digital libraries of

electronic components, maintained manufacturing documentation.

Falanster

Frontend Developer

JUNE • 2020 - AUGUST • 2020

Created and tested new pages and React components, set up email newsletter, fixed bugs, communicated with German back-end team.
